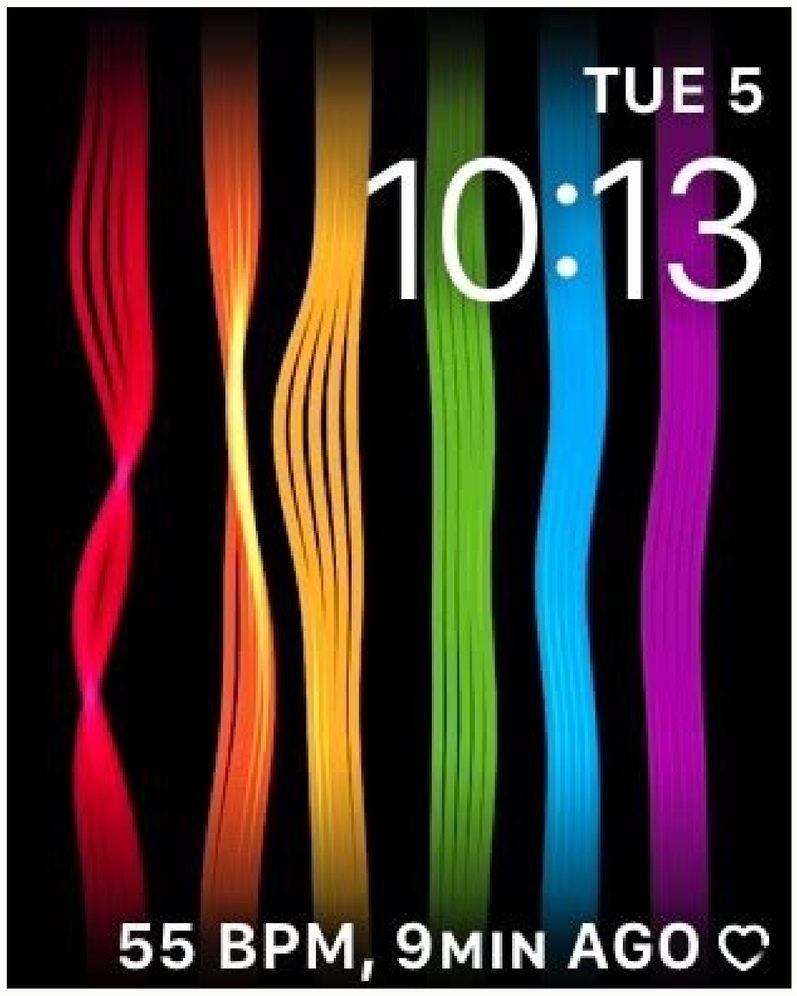
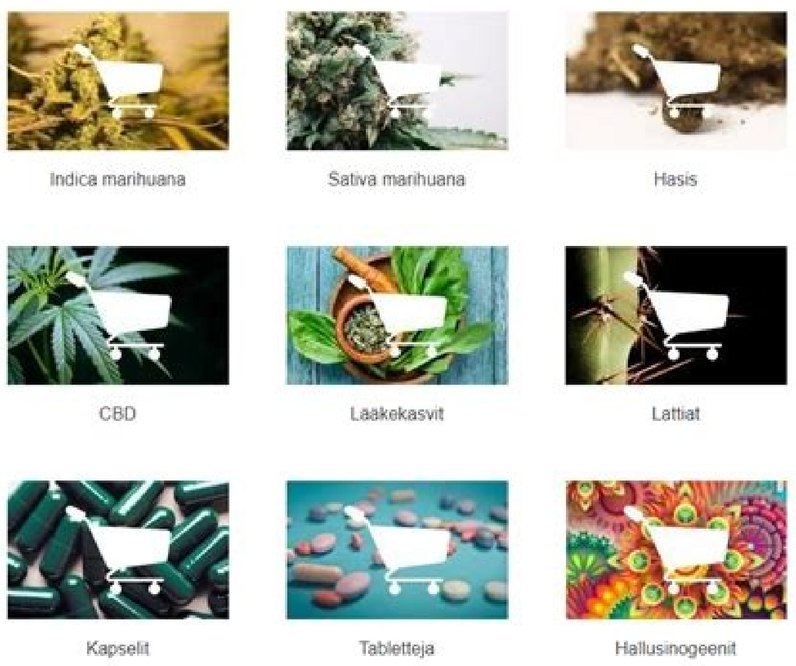
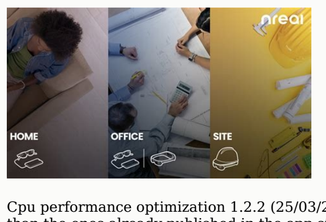
Android studio 3d model viewer







Cpu performance optimization 1.2.2 (25/03/2017) (f) Fixed #9. The application does not use any third party library. I don't care to use it with AR or anything fancy. Memory performance optimization 1.2.3 (27/03/2017) (f) Fixed #1. CS Student here working on a mobile dev project. So please, don't expect this application to be much richer or nicer than the ones already published in the app store, but at least it's opened to anyone who wants to contribute or don't want to start a similar project from scratch. In order to see models in 3D virtual reality, you need red-cyan and/or VR glasses If you have any issue in general,please open an issue and attach model if possible, specifying Android version and Device model. Documentation Acknowledgement The following copyright notice and this permission notice shall be included in all copies or substantial portions of the Software. Drawing the wireframe using GL_LINES and the index buffer (drawElements) 1.2.5 (01/04/2017) (f) Fixed #10. Map meshObject to texture only when using the only loaded texture (f) Fixed #11. News (02/02/2022) /Ã¡Â\ repo moved to the3deers organization + MIT License 2020 New version released 3.2.0 Repository Explorer improved Smoothing implementation fixed Fixed memory leak Checkout this to see the features of the application: Android Market Notice Collada support is limited. The main purpose of this app is to show how to draw in android using the OpenGL 2.0 by sharing the source code.
