GTA early to go to the Wii? After revealing assault on the finances of the third quarter at a conference, Take Two CEO Ben Feder hinted at a possible Wii iteration to join the development of DS Grand Theft Auto: Chinatown Wars game. With the strong contribution of GTA IV, Take Two's net income this year is 194; 163; 29 million, compared favourably with a £163; 33 million losses the year before. It's clear that franchising is a pretty lucrative prospect for the company, and a Wii GTA game is definitely something fans have been claiming since the console's launch. "Compared to GTA Chinatown I will tell you that we have spent a tremendous amount of time and effort working with Nintendo and developing that partnership," said Feder CEO. "We think we have significant value to add to that partnership and it is not a one-way relationship in any way. GTA Chinatown Wars is not even the first step, but certainly an important step to further develop that relationship." Until now, so cryptic, until someone asked Feder directly on GTA and the Wii, and Feder said without commenting "specifically whether he is coming to the Wii or not, I will say that Nintendo and Rockstar are starting to work well together and we intend to continue to grow that relationship." TechRadar contacted Rockstar, to be met with a firm and decisive "no comment", but continues to check for more news on this. Grand Theft Auto IV: Episodes From Liberty City is a compilation of three games: Grand Theft Auto IV, Grand Theft Auto IV: The Lost and the Damned, and Grand Theft Auto IV: The Ballad of Gay Tony. All betrayals from the original GTA IV work with this release, and there are new betrayals for the other two titles. Rockstar Games Enter game codes as phone numbers using the in-game mobile phone. The multiplayer features are compatible with both versions. Half the fun of Grand Theft Auto V and GTA Online is going around Los Santos in fast supercars. There are no shortages of incredible vehicles available to players, but trying to figure out which is the fastest is not as simple as you might think. Some may dominate in an acceleration race but end up in a ditch if you put them on a curved track. Others may excel around tornadoes, but they lack overall power. The following list is strictly based on the maximum speed of each car, as trying to determine many traits, such as the ability to maneuver and bend, is highly subjective and depends on personal preferences. Consider it a starting point for your experiments. Each vehicle below is one of the best in the game, but you will have to get behind the wheel before deciding which one is the right one for you. Regardless of what others think or even what the statistics say, each player has his own preferences when it comes to racing and his own weaknesses to take into account. But no matter which of these cars you end up choosing, you can be sure that he will win his fair share of the race. Here are the ten fastest cars in Grand Theft Auto V. Continue reading Ocelot Pariah (136 mph) Despite its sober appearance, Ocelot Pariah remains the fastest supercar in Los Santos. It is based vaguely on the Ferrari 812 Superfast and the Aston Martin V12 Zagato and, even with these amazing reference points, it still manages to be a rather low-key vehicle. It can be purchased from Legendary Motorsport and works for the high price of \$1420000. If you can Put all that money together, it's definitely worth it. Pfister 811 (133 km/h) Even if you don't guess, 811 is a little slower than Pariah. Featuring deep strokes and a traditional over-the-top spoiler, the 811 presents itself as the power plant of a vehicle. And to be honest, it's a little too slow to take first place on the list. However, the 811 is much cheaper than Paris, with 1.135. 000-dollar Legendary Motorsport. Prince Nine Eight (132 mph) The Mazda Furai continues to live in Prince Nine Eight. This imaginary car starts from the future prototype of the Mazda, with an extended trunk and a low profile that feeds the air inside the car, keeping things pleasant and cold during the intense conditions of the race. The sophisticated engineering is added, and the ninth-eighth-eighth price tag comes up to a huge \$1795000. Bravado Banshee 900R (131 mph) For years a benchmark in the GTA catalogue, Banshee continues to be one of the fastest cars in the game. Modelled around Mazda RX-7 and Dodge Viper, the coup e convertible is a light car that is a blast to throw curves and turns around. For just \$565.000, the Banshee 900R offers a lot of bang for your buck. Inveter Coquette D10 (130 km/h) It cannot be denied that it is one of the most beautiful cars in the whole GTA. Its aggressive style and strict control make it a popular choice for pilots of all skill levels, but its high price of \$1.510. 000 makes it a brand name for the ultra-rich. Pegassi Toros (128 km/h) As one of the few SUVs on the list, Toros is the ideal car for the escape of larger crews. Better still, it has a maximum speed that is more than able to hang with the most expensive supercars. Surprise your opponents by going down the track with a Pegassi Toros, and keep the hard-earned money in your pocket. Caves X80 Therefore (128mph) The X80 Therefore could be the car more which can be purchased on GTA Online. With a bold design with clippings, bezels, and an angular front bumper, it certainly fits the vision of a Supercar. It's not the best when it comes to braking, but if you're trying to go fast, it's hard to find something better. All this power can be yours for astronomical price of \$ 2,700,000. Custom Black Truffade (127MPH) point the line between the understated and aggressive is custom. Shaped after the Bugatti Vision Gran Turismo, the Black Custom is a powerful machine, if not a bit heavy. Great speed, fast acceleration and impeccable handling are all wrapped in a package that can be had for \$ 605,000. If you are not interested in dropping a few million on a wild supercar, we strongly advise you to take a look at this. Progen Emerus (127MPH) added during the Diamond Casino & Resort update, you will need to get lucky gambling if you hope to afford the second most expensive car in this list. Its price of \$ 2,750,000 may seem crowd, but you are getting a car that has a great superior speed, accelerates on a penny, and is probably one of the easiest cars to handle throughout the GTA. Because of its low weight, the emuscar can be thrown into tight corners with which some heavier cars tend to fight. If you have the money, then this is certainly a worthy investment. Krieger benefactor (127MPH) Complete the list is another vehicle added during the Diamond Casino & Heist update, and one that is profitable and expensive. Rated at 100,000 dollars more than emerus, Krieger boasts many of the same statistics of his cheapest cousin. Behind the wheel, it looks a bit like Emerus, but it's not so strong to brake and has a little more weight on her frame. Black painted, it looks a bit like the Batmobile, and the Audi R8 fans will love what Rockstar did with this elusive supercar. Publisher Recommendations
