Even better, tablets running Android 3.1 and later allow users to see 10 apps or more, as opposed to just seven with Android 3.0. Find out how to multitask on your Android tablet below. Switch AppsTap the Recent Apps button on the bottom left side of the screen next to the home button. Scroll to the app that you would like to open. Select it. Close AppsStop apps that are hogging system resources by digging into the Settings menu to close them. (Note: Tablets from companies that layer their own software on top of Android, such as the Lenovo Ki and the Samsung Galaxy Tab 10.1, do not need this tip.) Tap the time to open the notification window. Select Settings. Tap Applications > Manage Applications. Scroll to the application that you would like to close, then select Stop. Laptop replacementThere's one tablet that comes to mind when thinking of a laptop replacement and it's the Samsung Galaxy NotePro 12.2. With a massive 12.2-inch screen and the usual Samsung additions like multi-window and the S-Pen it pushes laptop replacement to a whole new level. You can read our review of the Nexus 7 (2013) here. The second choice the LG G Pad 8.3 has only come into consideration with recent price drops. These all rounder tablets must keep up with the daily demands while still having enough juice at the end of the day for a House of Cards marathon before you sleep. It's currently being sold for around \$200. We round up the best Android tablets for whatever task you've got in mind. The Samsung Galaxy Note 10.1 (2014 edition) offers even more screen real estate with a higher resolution and since it's a part of the Note family it comes with the great S-Pen which can be used to jot down notes and draw diagrams. With all of that in mind, you've actually got a few choices. The first and cheapest choice is the Asus Nexus 7 (2013). Retailing for around \$199 it features a quad-core Tegra 4 processor with a 72 core GPU. It also runs LG's own skin which offers multi-window support as well as a few additional features. One of the most important uses for a student's tablet is viewing textbooks and for that a high resolution display helps immensely. The usual speed and swiftness of any device is needed and extras like a stylus and multi-window support are positives as well. It's also a Nexus device meaning you'll get updates first and it comes with unadulterated stock Android. It offers a little bit more screen real estate, as well as a much nicer aluminium back construction. There's also the option to connect it to a bluetooth controller for an even more immersive experience. These price cuts have brought it within touching distance of the Nexus 7 (2013) and it's currently being sold for around \$300. It's light, fast, cheap and has a great screen. You can read our full review of the Samsung Galaxy NotePro12.2 here. All of this comes at a cost, and that cost is \$750. 9.9 1024x600 111253 sakura, art, sky 9.5 1024x600 85797 girl, umbrella, anime 9.5 1024x600 166463 girl, kitten, flower 9.5 1024x600 164537 girl, umbrella, anime 9.4 1024x600 260314 silhouette, night, starry sky 9.4 1024x600 300095 girl, umbrella, anime 9.4 1024x600 165206 girl, twilight, clouds 9.3 1024x600 86969 silhouette, starry sky, pillars 9.2 1024x600 80292 piano, silhouette, space 9.2 1024x600 102036 room, book, read 9.2 1024x600 78596 girl, shell, hare 9.2 1024x600 110507 anime, girl, wings 9.1 1024x600 107149 kimi ni todoke, girl, boy 8.8 1024x600 39414 girl, lights, water 8.8 1024x600 49411 anime, girl, art 55 47 88 81 63 23 13 61 50 14 51 18 23 25 47 41 42 14 19 14 15 19 20 26 The biggest advantage when buying Android is the sheer choice that you've got in front of you. GamingWhile many high-end Android devices will suit your gaming needs well, there are a few tablets that have gaming in mind. Both feature beautiful Super AMOLED displays and are light and thin. The Recent Apps button on Android Honeycomb tablets makes it a breeze to switch between open programs by presenting live thumbnail views of what's running. The Tab S 10.5 retails for around \$500 and the Tab S 8.4's asking price is \$399. Oh and did we mention that it's water and dust resistant? With all of that in mind you've got two exceedingly good choices. The Sony Xperia Z2 Tablet is light, thin and powerful. Students Students like myself are often on tight budgets and in need of something that gets the job done for the lowest price possible. It retails for around \$499 for the 16GB variant and you can read about the Xperia Z2 Tablet in our full review here. Samsung releases so many tablets that it's hard to ignore them in a tablet round up, and their latest offering is the Samsung Galaxy Tab S. You can read our review of the Galaxy Tab S 8.4 here. Which is your preferred Android Tablet and why? LG Samsung Sony Sony Xperia Tablets It also offers a tonne of features alongside the S-Pen and you can read about all of those features and more, in our review of the Note 10.1 (2014 edition) here. All rounder Often times you aren't looking for a tablet that does a specific thing exceedingly well, but rather, everything well. It also features front facing speakers and an HDMI out port, as well as the usual TegraZone app store for Tegra optimised games. That's also a downside, as stock Android currently lacks multi-window support and you won't get as many features as other tablets will offer. It doesn't skimp on performance either with a quad-core Snapdragon 800 processor backed by 3GB of RAM it has all of the power necessary to keep up with all of the intensive processes. They must also be durable enough to pass to the kids, and light and nimble enough to carry around all day. There are two variants of the Galaxy Tab S, a 8.4-inch variant and the larger 10.5-inch variant. They also offer the usual Samsung software features — whether you like them or not, like multi-window support. It's pretty much the perfect tablet for people in need of a do-everything tablet and waterproofing is great for those who need peace of mind that spilling the morning coffee on it won't do it the least bit of harm. The EVGA Tegra Note 7 is one such tablet offering high-end gaming performance at a budget price. Whether you want a large laptop replacement tablet or a small, nimble tablet to take around with you during the day, Android offers a wide variety of choice to suit your needs. You can find out more about the G Pad 8.3 by reading our review here. The third and final choice is a little more expensive for those with bigger budgets, or better yet, somebody else buying it for them.
